By SCOTT HOLTZMAN

Where has **Bob Dylan** been since his motorcycle accident?

Everybody's been asking and the usual rumors started. There was even a rumor that his brain was damaged and he would never sing or write again.

The latest report is that he will cut 14 new sides in Nashville for Columbia within two weeks, thus ending his contractual squabble with them. He has gone over to the MGM side now.

His new Columbia single is "Leopard Skin Pill Box Hat" from his "Blonde on Blonde" LP.

**Leonard Bernstein's** praise of **Janis Ian** on the recent Rock Revolution television show has created new interest in "Society's Child," which has been on the market for eight months with little reaction. KRLA-Los Angeles started an hourly editorial apologizing for not having the guts to play it before. Other stations across the country are following suit.

**Lesley Hornsby**, better known as **Twiggy**, has a new Capitol release called "Over and Over." It's not about to stop the world, but she's not bad. I'm sure it will get airplay just on the strength of her fame.

The house of **Ames** stands divided at present. Big brother **Richard**, who manages **Neal Ford and the Fanatics**, was thrown for a real curve when little brother **Steve** came up with "99th Floor" by his group, **The Moving Sidewalks**, which made Number 1 in Houston and was leased by **Scepter**.

They've been having a friendly little rivalry with both records battling for Number 1. "And it shall come from within..."

Speaking of rivalry, some of these local fan clubs are getting ridiculous with their

animosities toward each other. Come on, this is supposed to be a business of fun. Funny how most of the groups are friendly, but not the fans.

**Warner Bros** bought **Valiant**, acquiring **The Association**. I was surprised to see that **Larry Ramos**, formerly of **The New Christy Minstrels**, is now a member of **The Association**.

**The Druids** changed their names to **The Grammy Fones** and have a new national release on **Brent** which is stirring up action everywhere it's played.

Is it true that **Chuck Dunaway's** bedroom ceiling is covered with psychedelic posters and he uses a light machine to put him to sleep?

That's no Hell's Angel you see riding up to KNUZ on a motorcycle with a crash helmet. It's **Johnny Michaels**.

# A No. 1 Song

The top song in Houston belongs to **The Moving Sidewalks**, left. It's called the "99th Floor." The Sidewalks and their biggest competition, **Neal Ford and the Fanatics**, are led by brother agents.
